

This is Ternary Operator

```
import Bhopal from "./Bhopal";
import College from "./College";

import { useState } from "react";

const App=()=>{
  const [myval, setMyval]=useState(false);
  setTimeout(()=>{
    setMyval(true)
  },5000);

  return(
    <>
    <h1>this is condicational progrimng</h1>
    {myval ? <birthday/> : <setMyval/>}
    </>
  )
}
export default App;
```
